PROFESSIONAL SUMMARY

Data Science graduate from FAST NUCES Islamabad with hands-on experience delivering machine learning, LLM, data, automation, and full-stack products. Builds practical systems from model development and evaluation through FastAPI services, PostgreSQL, Docker, and responsive web interfaces. IEEE-published with strong problem solving, communication, and end-to-end project ownership.

EXPERIENCE

Data Science and Analysis Trainer - Future Connect Training and Recruitment Ltd *Aug 2026 - Present | Islamabad*

- Deliver hands-on training in Python, SQL, data analysis, machine learning, Power BI, Tableau, and project delivery; guide learners through debugging, documentation, and career preparation.

Full Stack Media Engineer - Speeqr *2026 - Present | Remote*

- Diagnosed real-time audio sync issues using NTP and GCC-PHAT alignment; fixed a 16 kHz to 48 kHz mismatch and reduced end-to-end latency from 3 to 4 seconds to under 1 second using adaptive jitter buffering.

AI Automation Engineer - Escaplix | AI and ML Freelancer *2022 - Present | Islamabad and Remote*

- Built LLM-based automation, REST APIs, data pipelines, classification and regression services, and client dashboards; integrated model APIs with internal tools for validated, context-aware workflows.

SELECTED PROJECTS

SkinVisionAI - AI-Powered Skin Disease Diagnosis System *2025 - 2026*

ConvNeXt-V2 | PyTorch | FastAPI | PostgreSQL | RAG | Gemini | Groq

- Built an end-to-end application for 11-class skin disease diagnosis with sub-second GPU inference, ROI preprocessing, and RAG-grounded reports with automatic fallback across three LLM providers; validated with 23 unit tests.

SME Retail and Inventory Intelligence Platform *2026*

FastAPI | Go | Next.js | Angular | PostgreSQL | Docker | Kubernetes

- Developed a CSV-first retail platform with per-SKU demand forecasts, inventory insights, secure natural-language analytics, role-based access, and a containerized multi-service architecture.

WGAN-GP Pneumonia Detection - Generative AI and Ensemble Learning *2026*

WGAN-GP | TensorFlow | VGG16 | ResNet50 | Transfer Learning | IEEE Conference Paper

- Created a two-stage framework that synthesizes chest X-rays to address class imbalance and applies a VGG16 and ResNet50 ensemble for pneumonia classification; published as an IEEE conference paper.

EDUCATION

BS Data Science - FAST NUCES Islamabad *2022 - 2026 | Graduated*

Coursework: Machine Learning, Deep Learning, NLP, Data Mining, Statistics, Databases, Software Engineering, and Data Structures and Algorithms.

TECHNICAL SKILLS

AI and ML: PyTorch, TensorFlow, Scikit-learn, Keras, Hugging Face, CNNs, transfer learning, GANs, RAG, LLM APIs, prompt engineering
Data and Backend: Python, SQL, Pandas, NumPy, FastAPI, Flask, REST APIs, PostgreSQL, MySQL, MongoDB, ETL, Power BI, Tableau
Engineering: JavaScript, Next.js, React, Angular, Docker, Git, Linux, AWS EC2, Postman, n8n, Zapier
